

## Grok Voice Track

**Focus:** Grok Voice api integrations

**Track Lead(s):** Scott Fitzgerald + Boyan Lin

**Office Hours Location (Sat 5pm - 9pm)** - Point Reyes

**Track Slack channel:** #track-grok-voice

### **Summary**

Integrate our conversational voice api into different use cases beyond the Grok app's voice mode.

### **Description**

#### **Example project ideas**

- Voice agents that can handle tasks in the background and make use of your phone from voice alone
- Persistent AI radio station with personality, show scheduling, and live listener requests
- Personal newscaster for your morning commute, with customizable focuses and story curation
- Generated podcasts with a host that curates content based on your interests
- Note taker/active listening scribe for day to day transcriptions

#### **Resources & starting points**

- Grok Voice details will be shared at the event (due to NDA)

#### **Judging criteria (in addition to general criteria)**

- Is this a product people would use every day?
- Is this a product that takes advantage of grok voice and creates novel use cases?
